Essay 5 Bibliographies

Note: These entries are not necessarily in the correct format for your Works Cited pages. In fact, some of them have been purposely altered to be incorrect and give you an idea of why a proper Works Cited page is so important! This has the effect of making your search for these sources more challenging . . .

1. The Large Hadron Collider (LHC)

- "Why a Large Hadron Collider?" An article from Seed Magazine in 2006 – I think I found it on the Seed website, but I’m not sure.
- "A Giant Takes on Physics' Biggest Questions" by Dennis Overbye. In the New York Times 15 May 2007, late ed.: F1+. Can’t remember where I found this one, but the New York Times is a newspaper, not a journal, so that would give me some hints about where to look.
- Kolbert, Elizabeth. "Crash Course: Can a Seventeen-Mile-Long Collider Unlock the Universe?" New Yorker 14 May 2007: 68. I’m not sure how I found this, but it’s from The New Yorker, not a journal . . .
2. PAMELA

- The PAMELA homepage: http://pamela.roma2.infn.it/index.php
- Ananthaswamy, Anil. "Has dark matter's telltale signature been spotted?" New Scientist Magazine Online. This article is from 2008, but I'm not sure how I found it.
- Casolino, M., et al. "Launch of the space experiment PAMELA." Advances in Space Research. I'm not sure where I found this article, but Advances ... is a research journal.
- Harris, David. PAMELA signal probably not dark matter. Symmetry Breaking. This is from a blog, and was posted sometime at the beginning of February.
- Overbye, Dennis. "A whisper, perhaps, from the Universe's dark side." New York Times 25 Nov. 2008, late ed.: D1+. Can't remember where I found this one, but the New York Times is a newspaper, not a journal, so that would give me some hints about where to look.
