Section Website: http://astro.cornell.edu/~tleung/teaching.html

Section:
Come with a calculator!
Please attend the sections, as each of them will worth 5 points.

Section is designed to help reinforce the lecture material. There will be time for general questions about the material; problems to further elucidate topics, and sometimes more group discussion about particular nuances. Please give me feedback: this will ensure section is as productive as possible!

Homework:
Homework is due in section, up to 24 hours late, no homework will be accepted after. Should you decided to turn in your homework within 24 hours after the section it is due, 20% of the total points will be taken off. No softcopies are accepted; please bring your hardcopy to section. For late homework, please turn in it to me in person -- my office is in room 108 (SSB).

Please make sure to write your name, Cornell ID #, section #, and TA name clearly on your homework to avoid confusion.

Office hour and email:
If you can’t make it to my office hours, you can go to other TA’s office hours.

If you are asking questions through email, please be as specific as possible. It will help me understand your question. However, please don’t ask questions directly related to the homework, e.g. is this answer correct, how do I do this problem, etc.

I will be glad to help if you are stuck in homework, we will step it through together, but you will have to explain your thought process, and which part is not making sense.

Cheating:
Don’t do it!

Ask questions:
Please do! You are probably not the only one with such question in ones mind. Even if so, what do you get to lose by asking a question?

“He who asks a question is a fool for a minute; he who does not remains a fool forever”
“The important thing is not to stop questioning”
